Attention: Assistant Division Superintendent

Gentlemen:

This is to acknowledge receipt of your notice of intention to drill Well No. Navajo B-1, which is to be located 2140 feet from the south line and 2140 feet from the west line of Section 29, Township 40 South, Range 24 East, SLEM, San Juan County, Utah.

Please be advised that this office cannot approve the drilling of said well at the proposed location. Said location does not conform to the temporarily established 80-acre spacing pattern adopted in Cause No. 8 (Consolidated Causes Nos. 8 and 11). A well located in the NE SW of Section 29 would be a direct off-set to your Well No. 1 (NW SE) which has been completed as a producing oil well and would also off-set the well being drilled by Texaco, Inc. located in the SE NW of Section 29.

The proposed location for the above mentioned well should be in either the SE SW or the NW SW of Section 29 to conform with the temporarily established spacing pattern adopted for the Greater Aneth Area.

Yours very truly,

OIL & GAS CONSERVATION COMMISSION

CITICOR SERVICE OIL COMPANY FOR AN	:	
ORDER GRANTING IT PERMISSION TO DRILL	:	ORDER
A WELL 2140 FEET FROM THE SOUTH LINE,	:	
2140 FEET FROM THE WEST LINE OF SECTION	:	Cause No. 21
29, TOWNSHIP 40 SOUTH, RANGE 24 EAST,	:	
SELM, SAN JUAN COUNTY, UTAH	:	

.....

REPORT OF THE COMMISSION

This cause came on for hearing before the Oil and Gas Conservation Commission of the State of Utah, on August 5, 1959, at 10:00 o'clock A.M. with all commissioners sitting, and with Commissioner Edward W. Clyde presiding.

Alfred O. Bell appeared for the applicant and Clair M. Senior, Attorney, appeared for protestant, Teneco Inc. When the case was called for hearing, all parties announced ready and the Commission proceeded to hear the evidence. The Commission, upon consideration of all the evidence and being fully advised in the premises, finds as follows:

FINDINGS

1. That this is an application of Citicor Service Oil Company for authority to drill a well to test the Paradox formation on its lease covering the Southwest Quarter of Section 29, Township 40 South, Range 24 East, SELM, San Juan County, Utah, at a location 2140 feet from the South line and 2140 feet from the West line from said quarter section.
2. That this location for a well constitutes an exception to the well spacing pattern established by this Commission for the Paradox formation in the Aneth Pool.
3. That the Commission has jurisdiction over the subject matter and notice has been given in all respects as required by law and the rules of the Commission.
4. That geological information presented indicated that not all of the above described tract is productive of oil and gas and that a well drilled at either of the regular locations on this tract would either be

dry or would be located in such structural position that would not permit effective drainage of the oil and gas underlying said tract.

5. That if the exception requested were not granted the acreage of applicant would suffer drainage of oil that should rightfully be produced by it, but conversely, if applicant were permitted to produce the well drilled at the requested location at a full allowable it would produce oil in excess of that underlying this acreage and would drain oil rightfully belonging to offset operators.

6. That applicant be permitted to drill a well at the requested location and be granted an oil producing allowable of 30 per cent of the maximum per well daily oil producing rate as defined in the Field Operating Rules for the Aneth Area or 50 per cent of the capacity of the well to produce, whichever is the lesser.

7. That if upon the drilling of the requested well by applicant, the information derived would show additional pay beyond what was anticipated by the testimony or if a completion could be made in the Loney formation, that this Commission will, upon request and notice, re-examine the facts to determine if an adjustment of the above allowable should be made. Additionally, if after drilling the requested well, the facts would disclose that the restriction imposed above in paragraph 6 would prevent the applicant from producing the reserves calculated to be present in the Desert Creek formation (or the Loney formation assuming completion can be made in that formation) or would enable the applicant to produce reserves in excess of those calculated to be present in the Desert Creek formation (or in the Loney formation assuming completion can be made in that formation), then this Commission will, upon petition and after notice, re-examine all of the facts to determine whether a readjustment of the allowable should be made.

ORDER

IT IS, THEREFORE, ORDERED by the Oil and Gas Conservation Commission of the State of Utah as follows:

1. That Cities Service Oil Company is authorized to drill a well at a location 2140 feet from the South line and 2140 feet from the West line,

Section 29, Township 40 South, Range 24 East, S1E22, San Juan County,
Utah.

2. That until further order of this Commission the oil producing allowable for said well shall be 50 per cent of the maximum per well daily oil producing rate as defined in the Field Operating Rules for the Aneth Area or 50 per cent of the well's capacity to produce, whichever is the lesser.

3. That the Commission retains jurisdiction for the purpose of re-examining the facts derived from drilling said well in order that any adjustment of allowable could be made to insure that applicant will be permitted a reasonable opportunity to produce the reserves of oil and gas underlying its acreage or to prevent production in excess of such reserves.

DONE AND PERFORMED this 5th day of September, 1959.

Gentlemen:

On the last USGS Form 9-329 A, "Lessee's Monthly Report of Operations", filed for the month of November, 1959, you noted that the above mentioned well might not be drilled.

Would you please advise us if you have any definite plans for this well as of this date.

Thank you for your assistance in this matter.
